ABOUT ME

I am a Laravel-focused web developer with practical experience building admin panels, booking systems, and business applications. I enjoy solving backend problems, improving performance, and building clean, structured code. I have worked on real client projects and understand production workflows. I am always learning and improving my development practices to build more scalable and reliable applications.

EXPERIENCE

Web Developer

Bluerank

2024

- Developed and maintained Laravel-based business and e-commerce applications.
- Built custom admin dashboards with role & permission management.
- Implemented dynamic CRUD modules, validation systems, and reusable components.
- Optimized database queries and improved page performance across modules.
- Fixed production bugs and improved existing code quality.
- Worked on security best practices including form validation and access control.

PHP Laravel Developer (Trainee)

W3Care Technologies Pvt. Ltd.

2024-2024

- Completed structured Laravel training through practical projects.
- Assisted in backend feature development for live client projects.
- Implemented CRUD operations, form validation, and database relations.
- Supported senior developers in debugging and feature improvements.
- Gained hands-on experience with MVC architecture and Laravel workflows.
- Learned real-world deployment flow and production issue handling.
